Trek from the top of the crater to the mysterious Lake Oku.

Hike through the forest where the natural world waits to be discovered.

Sit on the shores of the sacred lake without another soul in sight.

Swimming is not allowed in the lake as it is believed to be the home of an old woman's spirit who descended into the lake after being shown kindness by the people of Belo.

Because of this kindness, the lake's one inlet flows into Belo Village.

Sacrifices are still made one day a year to the 'God' of the lake.
